Art Unit: 2812

Applicant's election without traverse of claims 1-14 and 18-20 in Paper No. 3 is acknowledged.

This application further contains claims directed to the following patentably distinct invention of the claimed invention:

I. Claims 1-6, 8, 18-19, drawn to a semiconductor device, classified in Class 257, subclass 283.

II. Claims 7, 9-14, 20, drawn to apparatus of alignment, classified in Class 355, subclass 53.

The inventions are distinct and independent, each from the other because of the following reasons:

The inventions are distinct if either or both of the following can be shown: (1) that the apparatus as claimed can be used to make other and materially different product or (2) A different field of search. In the instant case unpatentability of the group I invention would not necessarily imply unpatentability of the group II inventions, for example, apparatus can be used for aligning optical devices.

Because these inventions are distinct for the reasons given above and as shown by the above different classifications, the fields of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Any inquiry of a general nature or clerical matters or relating to the status of this application or proceeding should be directed to the Group customer service whose telephone number is (703) 306-3329 and Fax number (703) 306-5515. Group receptionist telephone number 703-308-0956.
